

PALLET TRAILER

Incredibly functional!

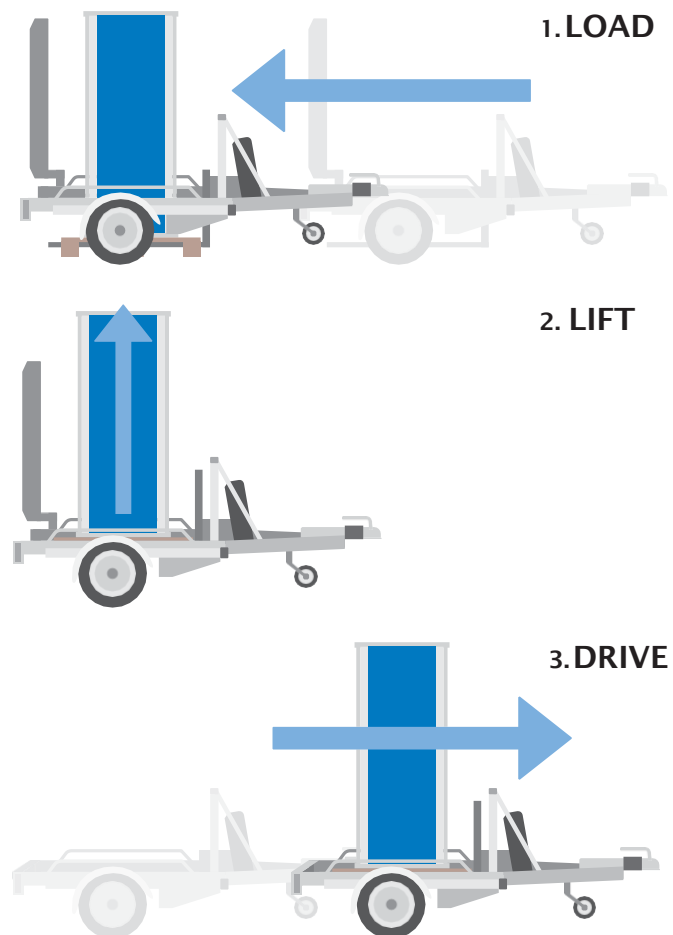

Loading and unloading with a self-loading trailer at any desired location? Without the need for a crane or forklift?

Because of the innovative design, the pallet trailer can do it all by itself!

Your flexibility is increased and the pallet trailer can be used for transport of virtually all types of pallets, boxes and units.

ADVANTAGES:

- No crane or forklift required;
- Stable road holding due to low centre of gravity;
- Ideal in narrow streets such as inner cities;
- Easy to manoeuvre in rough terrain such as construction sites;
- Simple and safe to use;
- Infinite number of applications;
- European approved.
